ACCELERATE YOUR JOURNEY TO INDUSTRY 4.0

MEASURE

CereBulb provides easy to install sensor package which integrates with existing control system

Advanced sensor package for better operational insight

- Vibration & Oil Quality
- Pressure & Temperature
- Flow rate & Many more...

Secure & revitalize vital data infrastructure

- Upgrade your existing process control network
- Process control cyber security threat assessment (ISA99-DMZ)

MONITOR

Looking at operational data is easy with CereBulb solution – A real time visualization with customized displays

CereBulb's experts and trained professionals help to securely configure/manage OSIsoft PI Software Suite

- PI Interface
- PI Data Server or PI Data Archive
- PI Asset Framework & Analytics
- Event Frame & PI Notifications
- PI Vision - real time operational insight
- Advanced Integration Services

ADVANCED ANALYTICS

Convert data into actionable insights. Scalable advance analytics for your enterprise

- Condition based maintenance
- Failure prediction (PM & PDM)
- Component life extension
- Data Science algorithm development (AI/ML)
- Real-time equipment monitoring by experts
- AR/VR development
- ERP/SAP integration
